Standard Error (base on PSD)	0.09

What could be done to improve the course?

| Comments |
|---|
| Give good examples for writing required analysis and application. |
| Essays due on Saturday rather than Friday. |
| Nothing. The class was a lot of work, but worth it |
| All in all this was a great course. My only frustration was with some of the readings – both in this course and my experience teaching H105/106. Its obvious IU wants its students to walk away with a very specific attitude toward U.S. history and perception of white people. This isn't really a criticism of the instructor, more so the instructor's employer. Including multiple viewpoints is not the same as endorsing them. |
| N/A |
| I cannot think of anything. It was an excellent course led by an excellent instructor! |
| I believe the instructor has a solid course layout and material so that all students can be successful. |

What aspects of the course were most valuable?

Comments
The readings that were picked for the course were very engaging.
Majority of the content was valuable; the instructor was able to break down the directions for the class to follow.
Introduction to weekly content for helping to give context to the reading.
I loved the reading. While it was a lot, it was great when looking at different aspects of the material and content.
The instructor was very flexible and understanding with deadlines. His feedback was useful and informative. The readings – for the most part (see above) – were interesting and engaging, even if I didn't always agree with what the historians were trying to push. The primary source proposal was a good assignment – I actually plan on using the lesson I planned for that in my own teaching. I felt that every module offered something new to think about in terms of information, perspective, or interpretation.
The professor was very helpful and flexible. The feedback was given quicker than any previous class I've ever had.
I really liked the structured nature of the course where I would have some summary/analysis for each week along with practical application of the things that I learned and thought about. As a classroom teacher, this exercise in thinking about how to bring what I've learned to my students was very helpful. In fact, I am going to borrow some aspects of the organization of this course to my own classroom...knowing what I would be doing each week helped me process what I'd read and what was posted in discussions more clearly. I also liked the final assignment not being an exam, but asking me to bring the whole course together conceptually and also to discuss how this material can be used in its totality with my students. I hope the rest of the IU grad classes I take are as well done as this one!
N/a

What aspects of the course were least valuable?

| Comments |
|---|
| No comment. |
| None. |
| N/A |
| The application posts were a little open–ended/vague, but aside from that I really enjoyed this course. Again, I wish IU wasn't so unified and insistent on this racialized way of looking at U.S. history, but that's not my battle to fight. |
| N/A |
| I did not feel like there was anything that served no purpose when it came to learning. No "busy work" of any kind...everything was focused on thinking and applying that learning. |
| N/A |
